

Preview and Apply Themes

Your theme developer creates themes that determine the look and feel of your site (if you are using an implementation that includes a site) or your [customized Fulfiller interface](#).

To display available themes, go to **Main > Content > Themes** and select a master catalog and site.

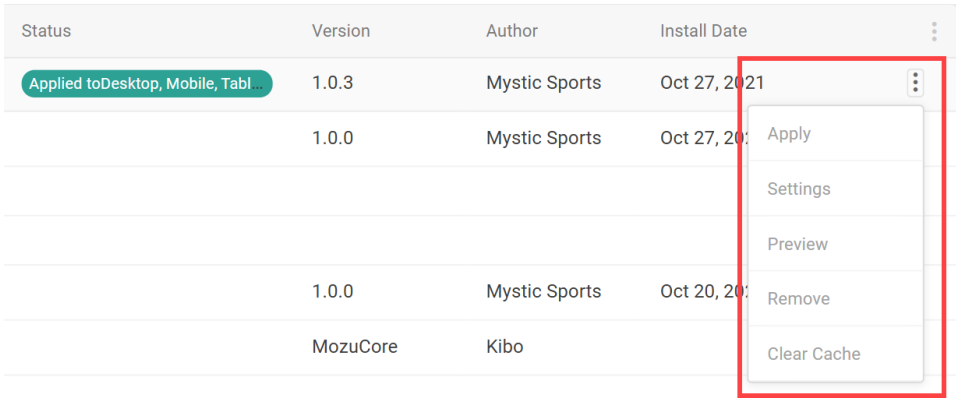

The screenshot shows a web interface with a navigation bar at the top. On the left, it says "Master Catalog" with a "MASTER" button next to it. On the right, it says "SITES:" followed by "B2C Site" (underlined) and "B2B Site". Below this is a table of themes. The table has columns for Name, Status, Version, Author, and Install Date. The first row is "Main Theme" with a green status badge that says "Applied to Desktop, Mobile, Tabl...". The second row is "Backup Theme". The third row is "Production Theme" with a collapsed arrow icon. The fourth row is "QA Theme" with a collapsed arrow icon. The fifth row is "Testing Theme". The sixth row is "KiboCoreTheme".

Name	Status	Version	Author	Install Date	
Main Theme	Applied to Desktop, Mobile, Tabl...	1.0.3	Mystic Sports	Oct 27, 2021	⋮
Backup Theme		1.0.0	Mystic Sports	Oct 27, 2021	⋮
▷ Production Theme					
▷ QA Theme					
Testing Theme		1.0.0	Mystic Sports	Oct 20, 2021	⋮
KiboCoreTheme		MozuCore	Kibo		⋮

If one theme contains multiple versions, it will appear as a collapsed row that you can expand to view all versions. Click the actions menu on the far right of a theme or version row to:

- Apply the theme to your site.
- View or edit the theme settings.
- Preview the theme on your site.
- Remove the theme from your site.
- Clear the cache of a theme that is currently applied. This allows you to immediately view changes after updating the theme, but should be avoided during peak trading hours.

The screenshot shows a close-up of the table from the previous image. The "Main Theme" row is highlighted. A red box highlights the actions menu on the far right of the row. The menu contains five options: "Apply", "Settings", "Preview", "Remove", and "Clear Cache".

Status	Version	Author	Install Date	
Applied to Desktop, Mobile, Tabl...	1.0.3	Mystic Sports	Oct 27, 2021	⋮
	1.0.0	Mystic Sports	Oct 27, 2021	⋮
	1.0.0	Mystic Sports	Oct 20, 2021	⋮
	MozuCore	Kibo		⋮

Theme settings vary depending on the theme and may be different for each display device. Examples of theme settings include banner image styles, search result options, font types, and navigation features. Your sandbox has the Core Kibo theme available for use on your site, as well

as any custom theme your theme developer may have installed.

Note that changes to these settings may not immediately take effect. It may take up to 15 minutes for updates to be reflected in the system while the cache refreshes, unless you initiate a cache flush using the options above.
