

# Overview

The Configurations Editor is the second step in your search configuration. This allows you to create a set of rules that applies to your site. Using the fields added in the Schema Editor, you can add additional parameters such as Product Slicing, MinMatch, Phrase Slop, Weight, Phrase Weight, Boost/Bury, and Whitespace.

## Navigation

To access from the home page, click **MAIN** in the left-hand navigation, click the **Search** drop-down menu, and then click **Configuration**.

# List Entries

As with the Schema Editor, Search Configurations are controlled inside of a catalog/site combination. You can create various settings, but only a single setting can be marked as the Default and applied to your site at a time.

You can change the default setting at any time as needed if, for example, you create a setting for an event such as a promotion. In that case, set the promotion setting as the default during the appropriate time period, and then return to your standard default when it's over. Changes to existing settings can be started by clicking **Edit** or **Delete** at the end of the row. Any setting can be deleted except for the default.

The screenshot shows the 'Search Settings' interface. At the top, there is a purple header with a menu icon and the text 'Search Settings'. Below the header, there is a breadcrumb trail: 'Mystic Outdoors Master' (with a 'MASTER' tag and a dropdown arrow), 'SITES', 'Mystic Outdoors', and 'Canada'. The main content area is titled 'Configurations'. Below this title is a table with the following columns: 'Configuration Name', 'Is Default', and 'Last Updated'. A 'Create New Configuration' button is located in the top right corner of the table. The table contains one row with the configuration name 'Test1', which is marked as 'Default' in a green pill. The 'Last Updated' date is '02/11/21 11:17 AM'. At the end of the row are 'Edit' and 'Delete' buttons. Two red arrows point to the dropdown arrow and the 'SITES' link above the table.

Configuration Name	Is Default	Last Updated
Test1	Default	02/11/21 11:17 AM
