

MinMatch

MinMatch ("Minimum number should match") allows you to specify a percentage of query words or blocks that should appear in a document. The allowable range is 0 to 100% and up to three values.

The screenshot shows a web interface for configuring search settings. At the top, there is a dark purple header with a hamburger menu icon and the text "Search Configurations Example Configuration". Below this is a navigation bar with tabs for "General", "Site Search", "Category Suggestion", "Product Suggestion", and "Listing". The "Site Search" tab is selected. The main content area is titled "Site Search" and contains a section for "Personalization Experience Identifier" with two input fields: "Personalization Exp ID" (containing "sdfdsf") and "Factor (0.1 - 100.0)" (containing "1"). Below this is a "Settings" section with four rows of controls: "Show Product Slicing" with an unchecked checkbox; "MinMatch (0-100%)" with a text input containing "75" and a "+" button (this row is highlighted with a red border); "Two Word Phrase Boosting" with an unchecked checkbox; and "Phrase Slop" with a text input containing "0".
