

# MinMatch

MinMatch ("Minimum number should match") allows you to specify a percentage of query words or blocks that should appear in a document. The allowable range is 0 to 100% and up to three values.

The screenshot shows a configuration interface for a search engine. A red box highlights the 'MinMatch (0-100%)' setting, which is currently set to 75. The interface includes sections for Settings, Field Weights, Boost/Bury, and Whitespace.

**Settings**

- Show Product Slicing
- MinMatch (0-100%)
- Phrase Slop

**Field Weights**

Name	Field Type	Weight (0-20)	Phrase Weight (1-20)	
productCode	code_exact	<input type="text" value="10"/>	<input type="text" value="0"/>	<input type="button" value="Delete"/>

**Boost/Bury**

Field/Attribute	Operator	Field/Attribute Value	Boost/Bury Value (-100-100)
