

Category View

The Category view provides dimensions and measures for the product category data model.

The supported filters that can be applied to this view are:

Name	Data Type	Description
Category Filter	String	Use to filter results by the category name.

The measures calculated by this view are:

Name	Measure Type	Description
Category Count	Count	Count of all category records.

The dimensions included in this view are:

Name	Data Type	Description
Catalog ID	Number	Unique identifier for the product catalog to which the product category belongs.
Category Code	String	External unique identifier of the category.
Category Created Date	Datetime	The timestamp of the date and time the product category was created.
Category ID	Number	Internal unique identifier of the category.
Category Last Updated Date	Datetime	The timestamp of the date and time the product category was most recently updated.
Category Name	String	The user supplied name for the product category.
Parent Category ID	Number	If the category has a parent, the identifier of the category's parent category.
