

Child Shipment Number View

The Child Shipment Number view allows a parent shipment to be connected to one or more child shipments.

The measures calculated by this view are:

Name	Measure Type	Description
Child Shipment Number Count	Count	Count of all child shipment number records.

The dimensions included in this view are:

Name	Data Type	Description
Child Shipment Number	String	Identifier for the child shipment.
Child Shipment Number Created Date	Datetime	The timestamp of the date and time the child shipment number was created within the system.
Child Shipment Number Updated Date	Datetime	The timestamp of the date and time the child shipment number was updated within the system.
Site ID	Number	Unique identifier for the site.
