

Product Attributes View

The Product Attributes view provides dimensions and measures for extensible attributes associated with the product model.

The measures calculated by this view are:

Name	Measure Type	Description
Count	Count	Count of all product attribute records.

The dimensions included in this view are:

Name	Data Type	Description
Attribute Input Type	String	The type of input selection used to define a value for the attribute, including Yes/No, Date, DateTime, List, TextBox, or TextArea.
Attribute Name	String	The user-supplied name of the attribute.
Attribute Value	String	The user-supplied value for the attribute.
Attribute Value Data Type	String	The data type of the source product property, typically of type Bool, DateTime, Number, or String.
Attribute Value Type	String	An attribute value type is either predefined vocabulary set by the admin during attribute set up, or user-defined with an appropriate type (AdminEntered or ShopperEntered, depending on the user).
Catalog ID	Number	Unique identifier for the product catalog to which the product attribute value belongs.
Fully Qualified Attribute Code	String	Unique identifier for the attribute to which the product belongs.

Name	Data Type	Description
Is Extra	Yes/No	If yes, the product attribute is an add-on configuration made by the shopper that does not represent a product variation, such as a monogram.
Is Option	Yes/No	If yes, the product attribute is a merchant- or shopper-configurable option, such as size or color, that represents a product variation.
Is Property	Yes/No	If yes, the product attribute describes aspects of the product that do not represent an option configurable by the shopper, such as screen resolution or brand.
Product Attribute ID	Number	Internal unique identifier of the product attribute.
Product Attribute Value ID	Number	Internal unique identifier of the product attribute value.
Product Code	String	The unique user-defined identifier for a product.
Product ID	Number	Internal unique identifier of the product.
Product Name	String	The user-supplied name of the product.
