

Shipment Package View

The Shipment Package view allows a shipment to be connected to one or more associated packages.

The measures calculated by this view are:

Name	Measure Type	Description
Shipment Package Count	Count	The count of all shipment packages.

The dimensions included in this view are:

Name	Data Type	Description
Carrier	String	Name of the carrier delivering the package.
Carrier Type	String	The carrier (USPS, FedEx, etc.) delivering the shipment.
Carrier Type Other	String	The carrier's name if it is not one of Kibo's listed carriers.
Delivery Type	String	The delivery type of the package.
Has Label	Yes/No	Whether a shipping label has been generated for the shipment.
Package ID	String	A unique identifier for the package. Will be automatically set by OMS upon creation.
Shipment Package Created Date	Datetime	The date and time the shipment package was created.
Shipment Package Updated Date	Datetime	The date and time the shipment package was updated within the system.
Shipping Method Code	String	The code associated with a carrier's shipping method service type used during fulfillment of packages and shipments.
Shipping Method Name	String	The carrier-supplied name for the shipping service type, such as "UPS Ground" or "2nd Day Air."
Site ID	Number	Unique identifier for the site.
Tracking Number	String	The tracking number assigned to the package by the carrier.
Tracking URL	String	The URL to track the shipment.
