

Content Overview

The Content section of the Admin UI allows you to apply themes to customize your Fulfiller UI and email/packing slip templates, view existing templates, and manage files such as product images.

Email and packing slip templates can be viewed at **Content > Editor**, but editing them must be done in a theme file which you can then upload at **Content > Themes**. For more information about these features and the customization process, refer to the [email](#) and [packing slip](#) documentation.

The guides in this category provide details about how to apply themes, manage files, and customize the Fulfiller UI.

If you are using the Kibo Composable Commerce Platform with a site, you may have access to additional functionality in the Editor as well as a page for configuring redirects. Contact for more documentation about these features.
