Content Overview

The Content section of the Admin UI allows you to apply themes to customize your Fulfiller UI and email/packing slip templates, view existing templates, and manage files such as product images.

Email and packing slip templates can be viewed at **Content** > **Editor**, but editing them must be done in a theme file which you can then upload at **Content** > **Themes**. For more information about these features and the customization process, refer to the email and packing slip documentation.

The guides in this category provide details about how to apply themes, manage files, and customize the Fulfiller UI.

> **ℹ** If you are using the Kibo Composable Commerce Platform with a site, you may have access to additional functionality in the Editor as well as a page for configuring redirects. Contact for more documentation about these features.
