

Subscription Localization

In order for subscriptions to work on international catalogs, you must set localized values for subscription attributes (Subscription Mode, Frequency, Trial Days, Trial Product Code, and Trial Product Variation Code).

You will configure this translated content at the master catalog level in both **System > Localization > Attributes** and **System > Localization > Attribute Values**. For more information about these pages, see [the attribute localization guide](#).

The examples below show how subscription attributes might be translated for a master catalog that uses the fr-FR locale. The relevant attributes can be identified by the system~subscription prefix.

The screenshot shows the 'Attribute Localization Grid' interface. At the top, there is a search bar and a navigation menu. Below the search bar, there are tabs for 'MASTERS: Test_MM', 'mp-cat', and 'Europe'. The main content is a table with the following columns: 'Attribute Id: Test_MM', 'Attribute Admin Name: Test_MM', 'en-US Attribute Name: Test_MM', and 'fr-FR Attribute Name'. The table contains five rows of data, each representing a different subscription attribute and its localized name in French.
