

Builder Integration

Builder's Kibo plugin helps you to connect your Kibo product catalog to Builder for seamless integration. This delivers exceptional customer experiences by harnessing the power of feature-rich, composable digital commerce. Meet customer expectations by creating experiences where order management data matters.

Prerequisites

To begin, you must have the following accounts:

- [Kibo Commerce Account](#)
- [An app integrated with Builder](#)

For information on how you can integrate Kibo with Builder and create a Kibo storefront using Builder, read this [document](#).
